

3 General things

1. Internet not working in cloudera VM?

Click on browser to check if internet is working or not by opening google. If internet is working then it's okay. Else you need to reconnect by disconnecting and connecting back again as shown in the above screenshot.

2. Want to copy data from local system & paste in cloudera VM?

Click on Devices -> Shared Clipboard -> Bidirectional

Once you do this you will be able to copy paste the content of a file.

3. Want to share files from local system to cloudera VM (shared folder) ?

Step 1 : create a folder on you local machine (windows/mac) with the name shared

share files from local system to cloudera VM (shared folder)

Step 2 : click on Devices -> shared Folders -> Shared Folder settings

share files from local system to cloudera VM (shared folder)

You will see the below screen.

share files from local system to cloudera VM (shared folder)

Step 3: in “Folder Path” browse to the folder with the name “shared” in local system (windows/mac). Copy the name that’s displayed in “Folder Name”. Checkbox “Make Permanent” should be checked.

share files from local system to cloudera VM (shared folder)

Step 4 : Open the terminal and type the commands as shown. “su” command will ask for password. The password is cloudera

```
cloudera@quickstart:/home/cloudera/Desktop
File Edit View Search Terminal Help
[cloudera@quickstart ~]$
[cloudera@quickstart ~]$ cd Desktop/
[cloudera@quickstart Desktop]$ mkdir shared
[cloudera@quickstart Desktop]$ su
Password:
[root@quickstart Desktop]# mount -t vboxsf shared shared
[root@quickstart Desktop]#
```

share files from local system to cloudera VM (shared folder)

Now you should be able to share the files between the local system and cloudera VM.

You can verify that by moving a file in “shared” folder in windows/mac.

Then try to see this file in “shared” folder in cloudera. The “shared” folder will reside on Desktop.

So what have we learnt?

1. How to fix your internet in cloudera if in case it is not working.
2. How to copy the content of a file from local machine (windows/mac) & paste it in cloudera.

Note: we can copy paste just the content of the file. But we cannot transfer the complete file.

3. How to create a shared folder. This helps us to share files between local machine and cloudera VM.
